Health Editor

[Company Name], a [State]-based nutraceutical company, has released a revolutionary new product which promises to cut your risk of heart disease and heart attack by up to 65%.

The proof? Numerous studies by various labs and universities. Their findings are published by the United States' National Institutes of Health and other prestigious medical journals.

This amazing turn of events has put the pharmaceutical industry on notice. [Company Name]'s newest product, [Product Name], costs a fraction of the expensive prescription drugs on the market today.

And it has none of the harmful side-effects. It's active ingredients have been studied exhaustively by laboratories all over the world with **AMAZING** results.

## **Reducing Inflammation is the Key to Reducing the Risk of Disease**

The most surprising finding? Its benefits extend beyond just heart health. In a [study](#) published by a team of researchers from Texas, Japan, and the UAE, the active ingredient in [Product Name] was also found to reverse insulin resistance, hyperglycemia, obesity, and obesity-related metabolic diseases.

All of these conditions have an effect on your heart health. By virtue of controlling these diseases, you are protecting your heart as well.

"Inflammation pretty much drives or plays a part in most diseases recorded including arthritis, heart disease, cancer and Alzheimer's disease. Reducing inflammation benefits people suffering disorders with an inflammatory component," [says](#) Stephen Eddey.

In yet another [study](#) of the active ingredient in [Product Name], researchers from Thailand concluded after 12 weeks of experiments, "treatment beneficially repaired and recovered heart microvascular... complications. This evidence suggests that potential... effect... is meaningful

about the ongoing therapeutic consequences, owing to the improvement and recovery of heart blood vessels.”

In short... [Product Name] will improve and repair the arteries and veins inside your heart!

### **A Powerful Wake-up Call to Men and Women Over 40**

[According](#) to the Centers for Disease Control, over 610,000 people die of heart disease every year in the United States.

That is about one out of every four deaths in America!

Even more troubling... about 735,000 people have a heart attack every year.

In addition, treating cardiovascular disease accounts for 17% of ALL national health expenditures each year and by 2030 is [projected](#) to cost an astonishing \$818 **BILLION!**

It's proven diet and exercise are one of the most effective preventative measures you can take to maintain your heart health.

But unfortunately, sometimes diet and exercise is simply not enough. Especially if you've lived an unhealthy lifestyle for too long.

But now, [Company Name] has developed, with the help of one of the most prestigious nutraceutical manufacturers in the country, a miracle pill which contains this “magic” ingredient.

By taking [Product Name] every day, along with your diet and exercise regimen, [Company Name] states you can cut your risk of heart attack by up to 65%.

And this claim is backed by a [study](#) published in the American Journal of Cardiology.

Subjects received the active ingredient in [Product Name] for three days prior to surgery and 5 days after surgery. The result? A 65% reduction in the rate of heart attack following surgery!

### **Findings Like These Only Happen Once in a Generation**

Don't let the pharmaceutical industry fool you. They spend **millions** of dollars every year telling you and your doctor why you need to spend **billions** of dollars each year taking their drugs.

But these drugs come with harmful side-effects which can sometimes cause more harm than good.

But the active ingredients in [Product Name] have been used for thousands of years. And they've recently been scientifically studied and proven to work, *with little to no side-effects whatsoever.*

And in yet another [study](#), researchers from China published their findings in the journal, Pharmaceutical Biology.

The same ingredient found in [Product Name] can “reduce the risk of coronary heart disease by... decreasing oxidative damage and inhibiting myocardium apoptosis.”

That is a fancy way to say it prevents heart damage caused by disease.

### **A Very Special Offer for Readers of [Publication Name]**

We are so confident of the health benefits of [Product Name], we've made a special offer available to our readers. In conjunction with [Company Name], you can call 000-000-0000 to request a **FREE** trial, 30-day supply of [Product Name]. You only pay shipping and handling.

If you are over 40 and have a family history of heart disease, or if you smoke, drink, or lead a sedentary lifestyle... ***you are in danger!***

There is absolutely no risk for you to take advantage of our special offer. And there is no obligation.

This special offer is valued at \$47.95, but by calling today, it is yours absolutely free.

**This Amazing Offer is Only Available for Readers of [Publication Name]  
But you must hurry and call RIGHT NOW!
